Core Development Stack

PROFILE

Unity Game Developer with 3+ years of hands-on experience building mobile games across simulation, racing, runner, shooter, puzzle and casual genres. Currently working at NiBG, strong in Unity/C#, gameplay feature implementation, UI flows, controls, polish, testing and release support. Known for taking ownership, fixing gameplay issues fast and turning rough prototypes into playable, store-ready experiences.

CORE EXPERTISE

- Gameplay Programming
- Mobile Game Development
- UI / UX Implementation
- Level & Progression Systems
- Bug Fixing & Optimization
- Android / iOS Build Support

PROFESSIONAL EXPERIENCE

Game Developer | NiBG

January 2026 - Present

- Develop Unity/C# gameplay features, mobile game systems, UI flows and production-ready game loops.
- Implement controls, level progression, animations, rewards and polish for Android/iOS games.
- Fix gameplay bugs, optimize mobile performance and support stable builds for store releases.

Game Developer | FANGENT Studio

January 2025 - December 2025

- Develop gameplay systems, UI screens, game loops and mobile-ready features in Unity/C#.
- Work on casual and hyper-casual game iterations, bug fixing, polish and release support.
- Collaborate with designers and artists to improve game feel, clarity and user experience.

Unity Developer | Software Alliance

August 2023 - December 2024

- Built reusable gameplay mechanics, UI controllers, scene flows and animation-driven interactions.
- Integrated assets, tuned controls/camera behavior and optimized Android build performance.
- Resolved gameplay bugs and supported stable, store-ready game builds.

Unity Game Developer | EAST WHIZ

November 2022 - July 2023

- Created gameplay prototypes and implemented core features for mobile game projects.
- Worked on game logic, UI interactions, basic AI flows and progression systems.
- Supported testing, debugging and final polishing before release.
